

ADDENDUM NO. 1- OSHPD ITEM 4 – EDITORIAL CORRECTIONS  
PAGE 17 OF THE MAY 2000 MONOGRAPH

ITEM 4                      APPROVE As Submitted  
OSHPD 3/99                in the September 1999  
                                    Monograph, page 23

**PART 1, CHAPTER 7**

**AMEND AS FOLLOWS SECTIONS 7-200 AND 7-204:**

**CHAPTER 7  
SAFETY STANDARDS FOR HEALTH  
FACILITIES**

**Article 19. Certification and Approval of  
Hospitals Inspectors**

**7-204.            Minimum    Qualification    for  
Examination.**

*An applicant must meet the following criteria to be eligible to participate in the certification examination for a Class "A", "B", or "C" Hospital Inspector:*

*(a) Minimum qualifications for Class "A" Hospital Inspector Exam:*

*(1) High school graduation or the equivalent and six years experience involving building projects of Type I or Type II construction as an architect's, engineer's, owner's, local building official's or general contractor's representative in technical inspection or inspection supervision [NOTE: Experience in subsection (a)(1) may be substituted with college education with major work in architecture, engineering, building inspection and/or construction on a year-for-year basis for a maximum of two years.]; or*

*(2) Possess a valid California registration/license as a mechanical, electrical, or civil engineer and two years experience involving building projects of Type I or Type II construction as an architect's, engineer's, owner's, local building official's, or general contractor's representative in technical inspection or inspection supervision; or*

*(3) High school graduation or the equivalent and two years of working experience as Class "B" Hospital Inspector; or*

*(4) Possess a valid California registration/license as a structural engineer or a valid California license as an architect.*

*(b) Minimum qualifications for Class "B" Hospital Inspector Exam:*

*(1) High school graduation or the equivalent and four years experience involving building projects of Type I or Type II construction as an architect's, engineer's, owner's, local building official's or general contractor's representative in technical inspection or inspection supervision [NOTE: Experience in subsection (b)(1) may be substituted with college education with major work in architecture, engineering, building inspection and/or construction on a year-for-year basis for a maximum of two years.]; or*

**The word "license" was not shown underlined which denotes new text.**

*(2) Possess a valid California registration/license as a civil engineer and two years experience involving building projects of Type I or Type II construction as an architect's engineer's, owner's, local building official's or general contractor's representative in technical inspection or inspection supervision; or*

**The May 2000 Monograph originally indicted that the number (b) (3) was shown as strikeout text, which denotes repealed text. This was incorrect. This is an existing section with an amendment, which is shown underlined.**

**Also the first word "or" was shown underlined. This word is existing text and is to remain.**

*(3) Possess a valid California registration/license as a structural, mechanical **or** electrical engineer, or valid California license as an architect.*

*(c) Minimum qualifications for Class "C" Hospital Inspector Exam:*

*(1) High school graduation or the equivalent and ~~two~~ four years experience ~~in involving building construction or maintenance in a hospital or skilled nursing facility projects as an architect's, engineer's, owner's, local building official's or general contractor's representative in technical inspection or inspection supervision~~ Experience in subsection (c)(1) may be substituted with college education with major work in architecture, engineering, building inspection and/or construction on a year-for-year basis for a maximum of two years.]; or*
